

The Kempler Model

Where Strategy, Technology, and Creativity Meet

The Win-Win-Win

Kempler's model creates value for three groups simultaneously—clients who need expert talent, specialists who want meaningful careers, and the business that connects them. This isn't just a staffing model. It's a system designed so everyone wins.

The Client Win

You get flexible, expert talent exactly when you need it—without the overhead of hiring full-time.

- **Fractional placements:** Access senior email, CRM, and marketing ops pros by the hour or project.
- **Depth on demand:** When you hire one of us, you get access to the full Kempler network—copywriters, data experts, strategists, and more.
- **Scalable support:** Start with one role, expand or contract as your priorities shift.
- **Results without risk:** Expertise without complexity.

The Career Win

Built for senior MarTech professionals who want more than a traditional job.

- **Senior career path:** Build a portfolio career with enterprise-level clients.
- **Billable, meaningful work:** Steady, challenging engagements—not random freelance jobs.
- **Side hustle friendly:** A professional home for your consulting work alongside your full-time role.
- **LLC & business support:** We help you build your independent practice with education and structure.

The Kempler Win

Kempler grows by investing in people, not overhead.

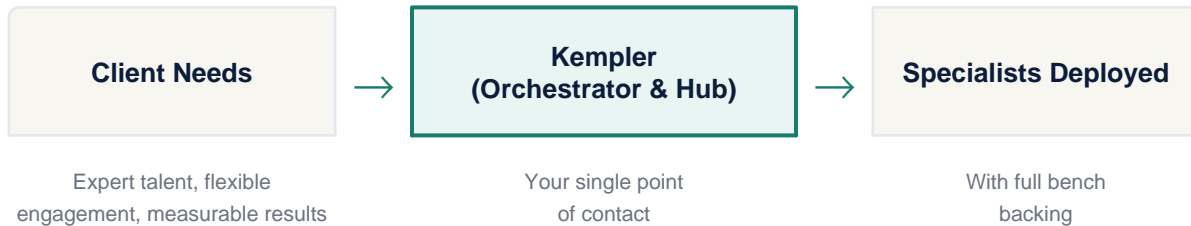

- **Blended rate model:** Senior talent combined with AI augmentation and junior support for premium results at competitive rates.
- **Skills on demand:** Add capabilities without adding headcount.
- **AI-augmented delivery:** Our team leverages AI tools to work faster and smarter.
- **Scalable by design:** The model grows with demand, not fixed costs.
